PROFILE

A **Microsoft Certified: POWER BI Data Analyst Associate** and a **MSc Advanced Computer Science graduate** with hands-on experience designing **Power BI** dashboards, automating workflows in Power Automate, and building secure data models using SQL. Proficient across the Microsoft 365 ecosystem including Excel, SharePoint and Teams. Experienced in integrating and visualising data across operational systems to support process improvement. Motivated to contribute to digital transformation through data storytelling, stakeholder collaboration, and technical problem-solving. Based in Derby with full UK work rights and no sponsorship requirements.

TECHNICAL SKILLS

Insight & Reporting Tools: Power BI, Power Query, Excel, Tableau, SharePoint, Power Apps

Data Analysis & Evaluation: Python (Pandas, Matplotlib), R (ANOVA, t-test), DAX, VBA

Databases: SQL (PostgreSQL, MySQL), MongoDB, Dataverse

Automation & Tools: Power Automate, Streamlit, n8n

Other: Microsoft 365 Suite (Teams, Outlook), Git Bash, JIRA, GitHub, Dataverse, SharePoint

PROFESSIONAL EXPERIENCE

Data Analyst Intern – Freelance (Remote)

03/2025 - 06/2025

Sri Sai Sastha Protection Agency, Chennai, India

- Designed and implemented **automated data pipelines and KPI dashboards using Power BI**, supporting performance reporting and operational planning.
- Built a **forecasting tool in Streamlit** with configurable logic to model planning scenarios and **improve future decision-making accuracy**.
- Collaborated with HR and operations teams to identify data needs and define indicators for ongoing reporting cycles.
- Improved reporting workflows through **Python and SQL ETL pipeline**, reducing manual reporting time by over 40%.
- Produced visual reports and summaries to support **evidence-based decisions by leadership teams**.

EDUCATION

MSc Advanced Computer Science

01/2024 – 07/2025

University of Leicester, Leicester, UK

B.E Computer Science and Engineering

08/2019 – 08/2023

Prathyusha Engineering College, Chennai, India

PROJECTS

3D-Emo: Designing 3D Visualisations of Human Emotions

Developed a real-time 3D emotion-recognition interface using Blender and Unity to visualise user interactions in real time. Applied quantitative and qualitative analysis techniques to model user feedback, delivered insights using Power BI dashboards and statistical analysis in Python/R

UK Restaurant Intelligence Dashboard

Developed a compliance dashboard using Power BI, integrating SQL and Excel data sources to assess hygiene performance across UK boroughs. Built automated refresh logic and parameter filters to support drill-through analysis for local authorities.
